

Future Crops for Bio-Diesel and Bio-Lubricants

Duane Johnson,
Northwestern Ag Research
Center
Kalispell, Montana

A Presentation By

DR. DUANE JOHNSON
MONTANA STATE UNIVERSITY
September 19, 1:30 - 3 PM
MUB Theater I

***FREE AND OPEN TO
THE PUBLIC***

Since 2001, Dr. Duane Johnson has been at Montana State University developing new products from alternative and commodity crops. Currently working on essential oil production and products, gluten-free cereal products, and vegetable oil lubricants and fuels, Dr. Johnson has also initiated research and development on natural rubber crops. His canola oil-based motor oil project was awarded the Platinum Award by the World's Best Technologies for 2004 from the National Association of Seed and Venture Funds and the Federal Laboratory for Technology Transfer.
