Monadnock Institute for
Community Advancement
and Sustainability**

"Without timely mitigation, world supply/demand balance will be achieved through massive demand destruction (shortages), accompanied by huge oil price increases, both of which would create a long period of significant economic hardship worldwide."

Report to US Department of Energy, March 2005

Monadnock 'Peak Oil' and Energy Summit

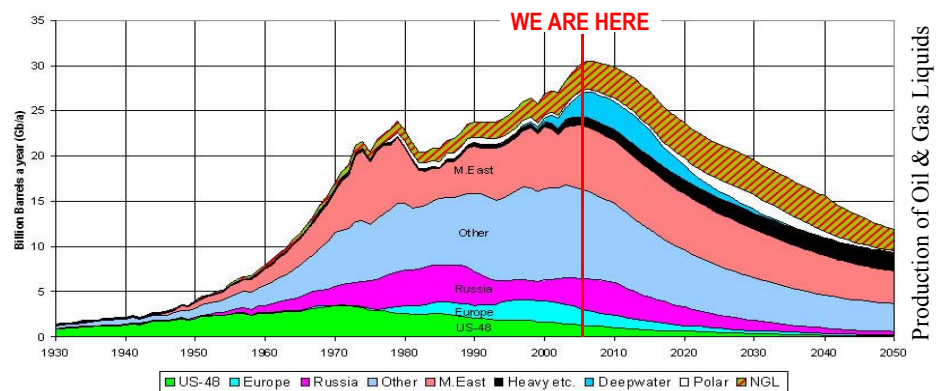

Free Presentation and Panel Discussion of the Global Decline in Fossil Fuel Production, its Consequences, and the Actions We Can Take

- SUSTAINABILITY RESOURCE FAIR 6:30-7:00
- PEAK OIL PRESENTATION
- Q&A WITH PANEL
- DISCUSS NEXT STEPS FOR OUR REGION

THE PARTY'S OVER!

Our modern way of life depends on oil for transportation, agriculture, food and water distribution, plastics, home heating, manufacturing, and medicine — even the modern banking system.
